

# Why the Project is Needed

- ▶ Woodmen Road serves as a regionally significant east-west corridor.
- ▶ Tremendous growth pressures on Woodmen Road over the past few years, have resulted in an increase in traffic and traffic accidents.
- ▶ Additional roadway capacity is needed to handle the increased traffic.
- ▶ Phase 1 is needed because it is the heaviest traveled part of the Woodmen corridor, carrying 100,000 vehicles per day through the intersection.
