

# Construction Noise Mitigation

## Loading trucks

- ▶ Lower bucket to reduce drop height of materials
- ▶ Position equipment away from sensitive areas
- ▶ Reduce power and speed as necessary
- ▶ Reduce decibels of back-up alarms as allowed

## Hauling materials

- ▶ Discontinue jake brakes
- ▶ Space trucks apart to reduce idle noise
- ▶ Reduce speed of trucks in haulage area
- ▶ Evaluate pavement condition and material

## Using pneumatic tools

- ▶ Use quiet compressors and mufflers on tools
- ▶ Erect sound barriers
- ▶ Erect tents or enclosures where applicable
